$$((x+1)^n - x^n) = \left(x + (x + 1)\right)$$

$$((x+1)^n - x^n) = \left((2 \times x) + 1\right)$$

$$((E + x)^n - E^n) = \left(x^n + \{x \times E \times n\} - \{E \times (x - E)\}^{(n-1)}\right)$$

$$((E + x)^n - E^n) = \left(x^n + \{x \times E \times n\} - \{E \times x\}^{(n-1)} - E^{\left((2 \times n) - 1\right)}\right)$$
